Course Name :  Statistics for Business                                    Max Marks : 70

Course Code : 1106

# Final Project

Dear Students,

Attached file includes the figures used to generate the world happiness report 2024. You are supposed to define each variable (ladderscore, upperwhisker, etc) and the scale (which variable is measured in which scale ,like likert, etc) in which it is measured. Moreover, you are required to define any five hypotheses using the variables measured in the file.

For eg. Does ladder score differs regionwise?
Test the hypotheses using the appropriate statistical tools studied in the course.
