**Second Year, Trimester V, Sep 2024**

**Course Name :** Corporate Valuation  
**Course Code :** 5103

**Max Marks : 70**

---

**Final Project**

=====

You have been hired as a Valuation Consultant by your client. Your client has given you complete freedom to choose a company (here onwards referred to as Subject Company) for valuation purpose. The subject company should be listed and you need to collect all sorts of relevant information (financials & others) in your own manner. You may like to choose primary/secondary/mixed sources as per your valuation requirements. Now, you are required to answer the questions as follows:

- 1) What type of information you would like to collect for the subject company? List out the information requirements with reasons, if any. (15 Marks)
- 2) For computing the WACC (Weighted Average Cost of Capital), which sources of capital you would like to consider? Explain it. (10Marks)
- 3) Describe the situation in which corporate valuation is done. (10 Marks)
- 4) Briefly explain the various approaches used for valuation of a company. Elaborate the approach you would like to follow with reasons, if any. (15 Marks)
- 5) List out the types of financial ratios you would like to use for the valuation. (10 Marks)
- 6) Would you follow any guideline for the valuation? Explain it. (10 Marks)
